

Assembling Folding Bikes - **RAYLIGHT** Ambassador

- FRAME

- 1) while lifting the vertical latch (pic. 1), push both halves of the frame together;
- 2) release the vertical latch, a clicking sound means the vertical latch has locked the frame;
- 3) turn the horizontal latch toward the front wheel and make sure it sits in the space without much force;
- 4) push down the handle on the horizontal latch, which adds the second locking to the frame (pic. 2);
- 5) if the latch handle is loose at locking position, adjust the nut at the end of the horizontal latch.

- HANDLEBAR

- 1) slide the handlebar into the head tube and align it;
- 2) turn the handle at the middle of the handlebar clockwise to tighten the handlebar;
- 3) please be aware there is a MAXIMUM mark on the post which defines the highest level of the handlebar.

- PEDALS (if necessary)

- 1) raise or push down the pedals to horizontal level;
- 2) the two halves of the pedal should snap into each other automatically;
- 3) push the pedal against the crank to fold it up (pic. 3).

- SEAT POST

- 1) slide the seat post into the seat tube and align the seat;
- 2) like the handlebar, there is a MAXIMUM mark on the seat post which defines the highest level of the seat.
